DO YOU KNOW WHY THINKING AHEAD AND PROTECTING YOUR ASSETS FROM THIRD PARTIES NOW IS CRUCIAL?

The primary criteria of asset protection, as one of the cornerstones of asset planning, is to protect the existing assets against the claims of third persons. In the era of FATCA, CRS and the EU's Beneficial Ownership Register, when the pursuit for transparency prevails, asset protection and privacy protection go hand in hand. Primus Wealth can provide the highest level of legal protection and one of the best tax benefits system for you. We can also help you get your privacy back whilst maintaining strong control over your assets.

EU AND US TRUSTS ARE THE MOST POWERFUL VEHICLES TO PROTECT ASSETS

Primus Wealth's clients enjoy both the very strong domestic asset protection regime, which does not provide access for creditors to seize the trust assets, and the vast investment protection treaty network of Luxembourg, Hungary, the EU and the US.

Primus Wealth's EU and US asset protection structures are tailored to meet our Clients' individual needs depending on the level of protection needed to protect the assets, on how aggressive the creditors are, and on the specific assets that need to be protected.

The most commonly used pillars of property protection:

LIMITED LIABILITY COMPANIES

EU AND US TRUSTS

HYBRID TRUSTS

ASSET MANAGEMENT FOUNDATIONS

PRIVATE EQUITY FUNDS
